

19. YORK LANE

BY GEORGE!

Temperance Lane, view from George Street

Temperance Lane

Issues

York Lane has a number of service entry points that would need to be maintained throughout the By George! program.

Opportunities

Characterised by highrise the streetscape of York Lane forms part of a bounded grid. Being the high point of the ridge on the western side of the City Centre the topography of the lane is generally flat. The buildings are built to the street alignment giving the lane a canyon like appearance which could be used to great effect given the numbers of office workers in the area.

Historical Information

The York Street properties that back onto the lane tend to be examples of Interwar warehouses and there are a number of mid block connections especially near Wynyard Station that enables thousands of workers access to the lane.

Adjacent Landowners

- Wynyard Green
- Bank of China
- The Clarence
